Experience

Blip (Flutter Entertainment) Aug. 2022 – Present
Software Engineer (Risk & Trading Systems) *Remote*

- **RISK SYSTEMS (2024 – Present):** Led the move to a new Risk squad, architecting React/TypeScript monitoring tools that render millions of live data points through virtualization.
- **AI Agent:** Built a multi-turn text-to-SQL agent (Python, LangGraph, AWS Bedrock and AgentCore) that turns traders' requests into Apache Druid SQL for betting-pattern alerts. Its React chat answers with the right UI component for each request, not just text (4-node StateGraph, Pydantic outputs).
- **Agent Evaluation:** Built an offline eval suite of JSON test cases that runs against the real LLM, used as a regression test so new features and prompt changes could ship without breaking what already worked.
- **AI-Driven SDLC:** Automated Jira ticket analysis, LLM-generated requirements, and parallel AI development and Playwright testing with *Human-in-the-loop* review (VS Code Copilot, Cursor, MCP).
- **Shared Libraries:** Contributed to internal React component library, and built a shared TypeScript utility library (tsdown) to standardize Playwright testing.
- **TRADING PLATFORMS (2022 – 2024):** Developed and optimized mission-critical React platforms for sportsbook traders, focused on high availability and UX for high-density workflows.

Education & Training

Instituto Superior Politécnico Gaya 2019-2022
B.Sc. in Computer Science *V.N. de Gaia, Portugal*

Full-Stack AI Engineering in TypeScript May 2026
iJS by devmio Bootcamp *London, UK*

AI Agents in the Browser and React Oct. 2025
React Alicante Workshop *Alicante, Spain*

Technical Skills

Frontend: React, TypeScript, Next.js, React Router, TanStack Query, Zustand, React Hook Form, Zod
UI & Build: Sass, Bootstrap, Vite, Microfrontends
AI & Backend: LangGraph, LangChain, AWS Bedrock, AWS AgentCore, Pydantic, Python, Node.js, Java
Testing: Playwright, Cypress, Vitest, React Testing Library, MSW
Infra & Tools: AWS, Docker, Terraform, ArgoCD, GitHub Actions, Cursor, GitHub Copilot, VS Code, Open Code
