

Filipe Moreira

Frontend Engineer | AI & E2E Systems

1

Experience

Blip (Flutter Entertainment)

Aug. 2022 – Present

Software Engineer (Trading & Risk Systems)

Remote

- **RISK SYSTEMS (2024–Present):** Spearheaded the transition to a new Risk-focused squad, architecting high-performance monitoring tools that process millions of live data points using advanced virtualization.
- **AI Engineering:** Designed and deployed an autonomous E2E AI-powered conversational agent (AWS Bedrock, LangGraph, Python) integrated into core internal tooling to accelerate trader workflows.
- **AI-Driven SDLC:** Architected a full-cycle automated SDLC flow: automated Jira ticket analysis, LLM-based requirement generation, and parallel AI-development/testing (Playwright) flows with *Human-in-the-loop* validation.
- **TRADING PLATFORMS (2022–2024):** Developed and optimized mission-critical trading platforms, ensuring high availability and fine-tuning UX for high-density trader workflows.
- **Engineering Excellence:** Built a shared internal utility library using TS Down to centralize logic and standardize E2E testing with Playwright.

Workshops & Training

Full-Stack AI Engineering in TypeScript

May 2026

iJS by devmio Bootcamp

London, UK

AI Agents in the Browser and React

Oct. 2025

React Alicante Workshop

Alicante, Spain

3

Technical Skills

Frontend (Modern): React (Vite, Zustand, TanStack Query), TypeScript, HTML5, CSS3, Next.js 16

Frontend (Legacy/Foundations): React Class Components, Angular, Redux, Webpack

AI/Backend: Python, AWS Bedrock, LangGraph, LangChain, Node.js, Java

Quality: Playwright (E2E), Cypress (E2E), WDIO (E2E), MSW, Vitest, React Testing Library, Enzyme

Infra: AWS, ArgoCD, Terraform

IDEs: VSCode, Cursor, OpenCode
